4. FIRST AID MEASURES

General advice : Remove the affected person from the danger zone to a well-ventilated room or to fresh air, and protect from undercooling.

Inhalation : Move to fresh air.

Skin contact : Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes.

Eye contact : Rinse eyes with clean water for several minutes and immediately call a physician.

Ingestion : If swallowed, seek medical advice immediately and show this container or label.

Notes to physician

Poisoning Symptoms : No case of human poisoning is on record.

Antidote : No specific antidote is known! Apply symptomatic therapy.
5. FIRE-FIGHTING MEASURES

Combustibility : yes

Suitable extinguishing media : Dry powder, foam, carbon dioxide (CO2) or water spray (do not use water jet).

Special protective equipment for fire-fighters : Wear personal protective equipment. In the event of fire, wear self-contained breathing apparatus.

Further information : Exposure to decomposition products may be a hazard to health. Collect contaminated fire extinguishing water separately. This must not be discharged into drains.

Swiss Fire Prevention Code : F4 S CO PN1

6. ACCIDENTAL RELEASE MEASURES

Methods for cleaning up : Refer to protective measures listed in sections 7 and 8.
Do not flush into surface water or sanitary sewer system.
Pick up and transfer to properly labelled containers.
Knock down dust with water spray jet.
Dispose of in an incinerator approved for chemicals.
Treat contaminated surfaces with water.
Put washing water in containers too, to avoid any contamination of surface and ground water, water supplies and drains. Hose down the area for a prolonged period. Heavily contaminated soil layers have to be dig out.
Spilled product cannot be used further and must be disposed of.
If safe disposal is not possible, contact the manufacturer, the dealer or the local representative.

Additional advice : Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

7. HANDLING AND STORAGE

Handling
Safe handling advice : Avoid dust formation.
Avoid contact with skin, eyes and clothing. Avoid breathing dust.
Smoking, eating and drinking should be prohibited in the application area.
In addition to the measures taken usually in the chemical works like dustproof filling and measuring equipment (including dust extraction), further personal protection measures may have to be implemented to avoid possible contact with the product.

Storage
Advice on common storage : Keep away from food, drink and animal feedingstuffs.
Novartis storage class : 9
Storage temperature : min. 2 °C - max. 30 °C
Other data : Store the product in closed original containers.
Protect from light and humidity.
