

CYTHROID WP

Active ingredient: Cyfluthrin (pyrethroid) 100g / Kg

Directions for use

Cythroid WP is a contact pyrethroid insecticide with an initial knockdown action and a long lasting action for the control of flies (including houseflies, stable flies), fly maggots, mosquitoes, cockroaches, bedbugs, fleas, fishmoths and ants.

Cythroid WP is odourless and can be used indoors or outdoors, e.g in and around homes, farm buildings, stables, dairies, poultry houses, schools, hospitals, industrial premises, food handling and processing establishments refuse dumps and market places. The length of the residual action depends on, the insect being controlled, the type of surface treated, the situation (indoors/outdoors), the weather condition but in general, under favourable conditions, months of control can be expected indoors and several weeks outdoors.

PEST	DOSAGE	DIRECTIONS FOR USE
Flies (<i>Adults including houseflies & Stable flies</i>)	20g-40g / 10L water	Apply as a residual spray or with paint brush to surfaces where flies settle, e.g walls, screen doors, window frames, etc. or spray onto garbage heaps and dung heaps. Apply to the point of wetness, or use 10L mixture/100m ² . Use higher dosage for long lasting control or where infestation is severe. Repeat when necessary.
Fly Maggots	5g / 10L Water	Apply as a drench using 10 L mixture/m ² of dung, garbage, straw or compost. Repeat applications should be made every time fresh material is added to heap.
Mosquitoes (<i>Adults</i>)	20g-40g / 10L Water	Apply as a residual spray or with paint brush to surfaces where mosquitoes usually settle, e.g dark corners, screen doors, ceilings, etc. Apply to the point of wetness, or use 10L mixture/100m ² . Use higher rate for long lasting control or where infestation is severe. Repeat when necessary.
Cockroaches Bed bugs, Fleas, Fishmoths	20g/ 10L Water	Apply as a residual spray or with paint brush to skirting boards, cracks, crevices and other places where insects may hide. Also apply to adjacent exposed surfaces where insects may crawl when they come out of hiding. Apply to the point of wetness, or use 10L mixture/100m ² to obtain long lasting control. Repeat when necessary.
Ants	20g-40g / 10L water	Apply as a residual spray or with paint brush to surfaces where ants crawl, e.g skirting boards, windowsills, walls etc. Apply to the point of wetness, or use 10L mixture/100m ² . Use higher dosage for long lasting control or where infestation is severe. Repeat when necessary.

20g

CYTHROID WP

Active ingredient: Cyfluthrin (pyrethroid) 100g / Kg

Acute Dermal LD (Rats): 2000 mg/Kg Acute Oral LD (rats): 79.4 -233 mg/Kg

Insecticide WHO CLASS II

POISON

Warnings

Poisonous when absorbed through the skin, swallowed or inhaled.

Toxic to fish, bees and wildlife.

Store in a cool place, away from food and feedstuffs.

Keep out of reach of children, animals and uninformed persons.

Do not spray directly onto foodstuffs or onto surfaces on which food is stored or eaten.

May cause irritation of the skin, eyes, mucous membranes and skin sensitization.

Do not apply to surfaces that are easily stained or water-marked unless it has been proven safe on such surfaces.

Do not spray directly onto animals.

Precautions

Do not use in the presence of persons with known sensitivity to pyrethroids. In case of sensitivity, obtain medical advice.

Do not inhale dust or spray mist.

Wear protective clothing.

Wash contaminated clothing.

Wash with soap and water immediately after use or accidental skin contact.

Clean applicator after use, dispose of wash water where it will not contaminate food, rivers and dams.

Destroy empty container and never use for any other purpose.

Antidote

Vitamin E may reduce the skin irritation.

Notes to Physician

Treatment is symptomatic. If swallowed and the patient is not vomiting, gastric lavage should be performed.
