Manufactured by : Rentokil Initial UK Ltd, Felcourt, East Grinstead, West Sussex RH19 2JY.

Telephone : +44 (0) 1342 833 022

Batch Number :

Contents : 25 kg

DIRECTIONS FOR USE

Fentrol is a ready-to-use bait. Bait labels must be affixed to any decanting bucket or vessel into which the bait is transferred prior to its placement at bait points. Always protect baits well so as to protect from the prevailing weather and to prevent access by humans, domestic animals and wildlife.

FOR RATS : Place bait in protected situations where rats are running or feeding. Use approximately 50g to 500g Fentrol per baiting point depending on infestation level (more may be necessary in severe infestations). Place the baits in runs or near harbourages to offer maximum opportunity for feeding. Inspect baits at appropriate intervals. Replenish bait as necessary until no more is taken.

FOR MICE : Use up to 10g bait, in a bait box or tray where appropriate. Place baits in protected situations, where mice are running and feeding. Inspect baits at appropriate intervals. Replenish bait as necessary until no more is taken.

PRECAUTIONS

AVOID ALL CONTACT BY MOUTH.

DO NOT PLACE BAIT where food, feed or water could become contaminated.

PREVENT ACCESS TO BAIT by children, birds and non-target animals, particularly dogs, cats, pigs, poultry.
