

**Mode of action**

Anti-coagulant rodenticide extremely effective even on rodents resistant to other anti-coagulants. Acts after ingestion.

**Directions for use**

Pests controlled : Mice and rats of any species

Properties: **Megalon Wax Blocks** are water-resistant and hence suitable for use in particularly humid environments and outdoors as well as in household, civilian and industrial premises.

Usage instructions : Carry out an inspection in the place to be treated. Create a few baiting points with a quantity of bait proportional to the infestation. The bait must be placed in the infested places, close to their feeding sites if possible or, alternatively, along walls, along rodents tracks, close to their furrows, in corners and under stacks of materials. Check the baits every 2-3 days and integrate them or renew them if necessary. Dead rodents must be burnt or buried to avoid secondary poisoning events.

**Warning**

This product is toxic to fish, birds and other wildlife. Place wax blocks in bait dispensing boxes or in other devices that protect the baits and discourage consumption by non-target animals. Do not apply this product directly to water.

**MEGALON WAX BLOCKS  
RODENTICIDE**

Active ingredient : 0.05 g/kg Bromadiolone  
Chemical group : Hydroxycoumarin derivative

**POISON****W.H.O. CLASS III**

Acute oral LD50 (rat) : > 20,000 mg/kg  
Acute dermal LD50 (rat) : > 20,000 mg/kg

**Antidote** : Vitamin K1 (15-25g)

**Note to physician** : Administer activated vegetable carbon (25-100 mg) and consult a physician
